T. T. Todd, Clerk.

**Municipality of Sifton****Court of Revision.**

**NOTICE**—The court for the revision of  
assessment roll of this municipality for the  
year 1885, will be held at the court room, Farkner  
Dickson's store, Oak Lake, on  
**Saturday, 13th June, 1885,**  
at 12 o'clock noon  
**V. G. KNIGHT, Sec.-Treas.**

**NOTICE!**

Is hereby given that a By-law to raise the sum of  
Four Thousand Dollars by the issue of Debentures  
to that amount, for the purpose of adding to the  
construction of a floating mill at Oak Lake station,  
or (in case of an insufficient supply of water being  
found there) at Flat Creek near the C. P. Railway  
Track, has been submitted to the Council of the  
Municipality of Woodworth, and that a vote of the  
ratepayers entitled to vote thereon will be taken  
on the 3rd day of June next at  
Ward No. 1.—The house of T. R. Todd.  
" 2.—The school house.  
" 3.—The house of Duncan McDonald.  
" 4.—The Rabotson school house.  
" 5.—The school house.  
" 6.—The house of Jeff Wilson.

Under the provisions of the Municipal Act, 1884.  
The said By-law provides that the said debentures  
shall be payable in twenty years with interest  
at seven per centum per annum, payable yearly,  
and that the amount to be levied in each year  
shall be \$2400 for interest and sinking fund for  
re-employment of principal.

The existing debt of the Municipality is nil the  
amount of its ratable property according to the last  
revised assessment roll is \$68,000, and the rate  
on the dollar levied according to the last rate  
struck is seven mills.

The said By-law or a true copy thereof is on file  
and can be seen at the office of the undersigned  
until the day of taking said vote.

The further consideration of the By-law after the  
taking of said vote is fixed for the tenth day  
of June, at the Council room, in the Rabotson school  
house, of the Municipality of Woodworth, at ten  
o'clock in the forenoon.

Dated this 22nd day of April, A. D. 1885.  
**T. R. Todd,**  
Clerk of the Municipality of Woodworth.

**FINE****JOB PRINTING**

Executed at the Mail Office.

**Municipal Work**

A SPECIALTY.

**OUR TEMPERANCE WORK.**

Conducted by the  
**W. C. T. U. OF BRANDON.**

**Robin's Mistake.**

What do you think, Red Robin,  
Found by a mow of hay?  
Why, a flask, brimful of liquor,  
That the mowers brought that day.  
To slake the thirst in the hay field,  
And Robin, he shook his head,  
"Now I wonder what they call it,  
And how it tastes?" he said.

"I have seen the mowers drink it,—  
Why isn't it good for me?  
So I'll just draw out the stopper  
And get at the stuff and see it!"  
But alas for the curious Robin,  
One draught—and he burned his throat,  
From his bill to his poor crop's lining,  
And he could not utter a note.

And his head grew light and dizzy,  
And he staggered left and right,  
Tipped over the flask of brandy,  
And spilled it, every mite.  
But after awhile he sobered,  
And quietly flew away,  
And he never has tasted liquor,  
Or touched it, since that day.

But I heard him say to his kindred,  
In the course of a friendly chat,  
These men think they are ABOVE US,  
Yet they drink such stuff as that!  
Oh! the poor degraded creatures!  
I am glad I am only a bird!  
Then he flew up, over the meadow,  
And that was all I heard.

**SCOTT ACT NOTES.**

**By Rev. J. Lawson, Corben,**  
**Ontario.**

(XIV.)

To refuse to vote for the Scott Act  
because it is really and truly out  
and out prohibition, is about as re-  
asonable as it would be for a hungry  
man to refuse a good large slice of  
bread because there was not a whole  
loaf of bread and joint of beef.

Suppose you meet a person who  
is suffering from a terrible toothache.  
You propose a remedy which will  
give instant relief, but the sufferer,  
as soon as he learns you are not go-  
ing to take out the tooth, root and  
all, positively refuses to allow the  
pain to be relieved. Such a person,  
it such could be found, might possi-  
bly be in favor of prohibition and  
still he would vote against the Scott  
Act.

But if the sale of intoxicating li-  
quors for beverage purposes be stop-  
ped, what is it that but putting a  
stop to its manufacture to a very  
great extent? Do merchants keep  
buying in stock that will not sell?  
Do manufacturers keep on turning  
out a class of work that will in all  
probability remain on their hands  
as dead stock? Will brewers and  
distillers keep on brewing and dis-  
tilling if the sale of their liquors are  
almost entirely stopped? The fire  
is put on equally as well by stopping  
up the top of the flue as the bot-  
tom.

Supply is regulated and governed  
by demand. Stopping the sale of  
liquor—unless in exceptional cases  
provided for in the Act, to be notice-  
d hereafter—is unquestionably stop-  
ping its manufacture to the very  
same extent.

Vote for the Scott Act and you  
will assist in putting a stop both to  
the sale and manufacture of this ter-  
rible scourge of mankind.

**Moderate Drinking.**

The National Temperance League  
recently invited medical men of  
known authority to lay before an  
Exeter Hall audience their views on  
moderate drinking. Dr. A. Carpen-  
ter, Dr. B. W. Richardson, and Mr.  
J. J. Ritchie, M. R. C. S., did so at  
considerable length. Other medical  
men were on the platform. The  
Bishop of Exeter, who presided, was  
very emphatic on the duty of weigh-  
ing the matter. Dr. Carpenter, in  
an able argument, contended for the  
entire disuse of alcoholic stimulants  
in ordinary life. He asked the meet-  
ing to stand by those professional  
men who had the courage to be hon-  
est on the subject, and who set their  
face against the so-called "moderate  
drinking" of the day. Mr. Ritchie  
gave a powerful testimony as a med-  
ical man, who for over forty years  
had been identified with total ab-  
stinence. Dr. Richardson discussed  
the pros and cons. in reference to  
alcohol. Some people speak of it,

he said, as a good friend, whom they  
receive into their house, welcome at  
their table, but who, nevertheless,  
sometimes turns around and knocks  
them down in return. The address-  
es were well considered, weighty,  
valuable. They were reported in  
full in The Temperance Record of  
last week.

**PROVINCIAL.**

A man named Marsden, a former resident  
of New Hampshire, committed suicide at  
Selkirk, by hanging, last week.

The new post office building at Winnipeg  
will be 120x60, and four stories high. It  
will contain the savings bank, P. O. Inspec-  
tor's office &c.

The old steamer Cheyenne went to the  
bottom of the raging Red near Morris the  
other day. The only loss was a good soak-  
ing of its contents.

Virden has organized an Grange Lodge,  
which opens with a good membership.

Mrs. Humble died at Rat Portage the  
other day through eating some wild fungus  
taken for mushrooms.

Emerson is closing his schools through in-  
ability to pay teachers.

The conference of the Methodist Church  
commences today in Winnipeg. The an-  
nual sermon is to be preached by the Rev.  
Mr. Bots, Brandon, and the annual theo-  
logical lecture delivered before the union  
by the Rev. Mr. Franklin.

The Hon. Mr. LaRiviere will have the  
sympathy of the community in the loss of  
his wife on Saturday last.

The Pacific hotel, Whitmouth, has been  
destroyed by fire; loss, \$3,000.

**TURKEY FOR OR AGAINST?**

In considering the attitude likely to be  
assumed by Turkey in the event of a war  
between England and Russia two things  
must be borne prominently in mind—the  
prejudices of the Turkish army and the  
necessities of the Turkish exchequer. It  
is something more than a supposition with  
the European Powers that Russia is their  
most relentless foe. Constantinople is the  
first dream of the Muscovite heart. Herat  
and the road to the Indian ocean is mere-  
ly a diversion. The Turk is perfectly con-  
scious of the coveted eye that is never  
taken off the Bosphorus and the waterway  
into the Mediterranean. He knows that  
it is only by the surrender of the Euro-  
pean powers he is allowed to block Russia  
in the Black Sea, and he knows that  
England has been chief among the pow-  
ers in maintaining him where he is. The  
common soldiery and officers of the Tur-  
kish army have been trained in the school  
of conflict and defeat to hate the Musco-  
vite and Cossack. Plenty is yet fresh in  
their memories. They know that single  
handed they are no match for the armies  
of the Czar. But with Russia engaged  
protecting herself at every point from the  
English attacks, and confronted in Cen-  
tral Asia by Afghan, Indian, and English  
troops, they may dream of relieving the  
losses of their last war. It is therefore not  
surprising to learn that the Turkish army  
favors an English alliance.

But a more potential factor in deciding  
the question of Turkey's attitude is Tur-  
key's Treasury. This is in its usual con-  
dition—"broke." Russian finances were  
on the verge of bankruptcy before she de-  
termined to seize on Afghan territory.  
They are strained to the utmost in the  
gigantic preparations she is making for  
war. Her guaranty of a new Turkish loan  
would not help the ports to a dollar. Eng-  
land on the other hand, is solvent and a  
great money lender. It has guaranteed a  
new Turkish loan it will be discounted in  
the money centres of Europe. It is,  
therefore, easy to credit the cable report  
that says: "It is believed that Turkey  
has already given her option in favor of  
England on the promise of the latter's as-  
sistance in floating a new Turkish loan." Money is the great power in securing al-  
lies among second class nations, espe-  
cially where they are under the Government  
of impetuous and irresponsible despots.  
Germany and Austria declare that it  
would be a breach of neutrality for them  
to bring any pressure on the ports to close  
the Dardanelles, and so we may expect  
English gold to control the gates to the  
Black Sea, whatever may happen at the  
gate to Herat.

**AN AWFUL BIG PRICE.**

Two "mourners" were returning from a  
funeral at a very fashionable cemetery.  
"Dr. Intone said the service beautifully,"  
said one.

"Don't he?" said the other. "Do you  
remember how impressively he uttered the  
words, 'O death where is thy sting, O grave  
where is thy victory?'"

"Yes, very beautiful. How much do those  
lots there cost?"

"I think they sell from \$500 to \$5,000."

"Good!" It may not be much of a "vic-  
tory" but it's a terrible big price."

**Engine and Boiler**

**FOR SALE,**  
2 Horse power, in excellent condition. Can be  
seen at Child's Machine Shop, Brandon. Also a  
**COMPLETE SAW MILL OUTFIT.**  
Apply to  
**S. GRIGG, Brandon.**

BRANDON.

We have had an early spring and crops were in a good season, but along with the early spring, the weather retarded vegetation. The warm rains of the last few weeks have been doing good, and the crops in this vicinity are looking magnificent, showing the farmer with the prospect of an abundant harvest. The uncertain prospect of the Southwestern Railway being built, has put the farmers from doing much planting, as we cannot see the force of doing crops and running them a long distance at considerable loss where it should be a gain.

The school at Nepona is flourishing under the able direction of Miss Crowell. The County of South will celebrate the centennial of the county. A picnic will be given on the banks of the South near the town of the county. If you, Mr. Editor, would like to see the old folks of Brandon, you would do well to spend a very pleasant day and see a view of the lovely city of Brandon.

Burlington

SMALL TOWN.

The undersigned now offers for sale some good lots in the

TOWN OF BURLINGTON!

situated at the

Narrows of Shoal Lake.

The location is one of the

finest in the Northwest, and

having the prospects of the

early construction of the

M. & N. W. Railroad

through the place.

It is destined to be NOT

ONLY a good place of business, but

A PLEASURE RESORT!

being situated at a Beautiful Clear Water Lake, nearly

two miles wide by five long; its waters abounding with

plenty of fine fish and good

shooting. It has nice scenery

around the lake, its banks being high & gravelly

covered with timber. Also a

fine view of the Riding

Mountains, a distance of 12

miles off. Although being

centered in a large extent of

agricultural lands which is

settled with a good class of

farmers, it is bound to become a large town.

For further information or a view of plans may be seen at the office of

MORPHY & STEWART,

Minneapolis.

### THE CHERUB'S ENQUIRY.

Children's ideas of usefulness in this  
world are primitive, to say the least. A  
Boston editor has a five year old boy who  
has pronounced views on this subject. He  
said the other day at the table:  
"Papa, I wish you were a bake shop  
man!"  
"Why, my boy?"  
"Because then you could bring home  
cakes and things, and we could go in and  
get cookies when we wanted to. Or if you  
were a meat-man, or a grocery man, or a  
carpenter and made nice things, or a black-  
smith-shop man—that would be useful  
fun. Say, papa, is it any good what you  
do?"

### MUNICIPALITY OF CORNWALLIS.

The council of the above municipality  
met in Brandon on Wednesday the 20th ult.  
with all the members present except the  
Reeve.

H Rice's amount of \$500 for repairing the  
bridge across Little Souris River was passed.

#### RESOLUTIONS.

Baker and Baker, re Rowan and Glen  
Souris School Districts.  
The committee appointed to examine and  
report on the practicability of moving the Glen  
Souris school house across the Little Souris  
report it practicable, and that estimates to  
remove the building and repair all damage  
for the sum of \$215. Be it resolved that  
in the opinion of this council, the interests  
of the majority in both districts will be best  
served by allowing the two districts, Glen  
Souris and Rowan to remain as they are  
now formed, and moving Glen Souris  
school house to the centre of the district.—  
Carried.

McKay and Baker, re application from J  
Empey for remuneration for loss of horse  
through defective bridge, be laid over for  
consideration. Carried.

Stewart and Baker—That a by-law be  
prepared granting Wm Currie a bonus of  
\$40 towards maintaining his for y, in con-  
sideration of his making a reduction in  
charges as follows:

Team one way 25c.	Foot passenger 10c.
do return 35c.	Animals of all kinds
Single rig 15c.	loose 10c for one
do do return 25c.	and 5c for each ad- ditional.

#### Carried.

Stewart and Baker—That the Treas- be  
instructed to pay R 3m th for assessing, \$45.  
—Carried.

McKay and Baker—That the Treas be in-  
structed to accept the net amount of Wm  
Barber's taxes, viz \$92-24.—Carried.

Baker and Stewart—that a by-law be pre-  
pared empowering the acting Reeve and  
Clerk to sign a note for \$250 in favor of  
W C Brown, payable on the 31st of Dec.,  
as compensation for a team of glandered  
horses valued at \$400 and destroyed by order  
of V. S.—Carried.

Stewart and Baker—That Mr. Doran, as

noxious weeds overseer, have as his dis-  
trict tp 5, rg 18 and 19, and tp 10, rg 19,  
and Wm Corrie, tp 10, rg 17 and 18, and tp 9,  
rg 17.—Carried.

Stewart and Baker—That Messrs. Doran  
and Little, pathmasters, be allowed to ap-  
ply statute labor of any who are willing on  
the road between sections 26 and 27.—  
Carried.

The council then adjourned to meet on  
the first Wednesday in June.

G H HALSE,  
Sec. Treas

### HE DID NOT BELIEVE IN DOCTORS.

The Count De V—, prime minister to  
the King of Sardinia, affected mystery so  
much in all his transactions, both public  
and private, that, happening to hurt both  
his legs very severely, he employed a sur-  
geon for each limb, while each was kept  
ignorant that the other was employed. The  
treatment, therefore, adopted by the medical  
men, and the nature of the drugs they ad-  
ministered, being quite inconsistent, the  
consequences proved fatal to the minister.

### SUITING THE WORDS TO THE ACTION.

A New York Sunday school teacher told  
her pupils that when they put their pennies  
into the contribution box she wanted each  
one to repeat a Bible verse suitable for the  
occasion. The first boy dropped in his  
cent, saying, "The Lord loveth a cheerful  
giver." The next boy dropped his penny  
into the box, saying, "He that giveth to  
the poor lendeth to the Lord." The third  
and youngest boy dropped his penny say-  
ing, "A fool and his money are soon  
parted."

#### A SECRET.

The secret of heavy lies in pure blood  
and good health. Barlock Blood Bitters is  
the grand key that unlocks all the secre-  
ts. It cures all Scrofulous Diseases, acts  
in the Blood, Liver, Kidneys, Skin and  
Bowels, and brings the bloom of health  
to the paled cheek.

## NEW DEPARTURE

Commencing Feb'y. 2nd, 1885, the following editions of THE DAILY GLOBE will be mailed  
to subscribers throughout Canada, the United States and Great Britain:

DAILY GLOBE—Morning Edition	3 mos. \$1.15	6 mos. \$2.30	12 mos. \$7.00
DAILY GLOBE—12 o'clock	1.00	2.00	4.00
DAILY GLOBE—3	1.00	2.00	4.00
DAILY GLOBE—Saturday Morning Edition	35	65	1.25

## THE WEEKLY GLOBE

SPECIAL TRIAL TRIP—TWO MONTHS

ONLY 15 CENTS

We want to increase our present large list of subscribers by ten thousand within the next  
30 days, and for this purpose make the above liberal and unprecedented offer.

In addition to the above liberal offer we make the following: ANYONE SENDING US  
75 cents and 5 subscribers will receive an extra copy for two months free.  
\$1.50 and 10 subscribers will receive an extra copy for five months free.  
\$2.25 and 15 subscribers will receive a copy of Biography of the late George Brown.  
\$3.00 and 20 subscribers will receive a copy of THE WEEKLY GLOBE for one year free.  
\$4.50 and 30 subscribers will receive a copy of Saturday's DAILY GLOBE one year free.  
\$7.50 and 50 subscribers will receive a copy of THE DAILY GLOBE four months free.  
\$15.00 and 100 subscribers will receive a copy of THE DAILY GLOBE one year free.  
Subscribe now and secure reports of both Parliaments for only 15 cents.

THE GLOBE has special arrangements by which it possesses the sole right in Can-  
ada of publication of new novels by most of the leading writers of  
fiction, such as Wilkie Collins, Miss Braddon, Justin McCarthy, E. L. Farjeon, Sarah  
Bouchey, William Black, Mrs. Oliphant, Hugh Conway, and others.

A story of enthralling interest, entitled WILLARD'S WEIRD, by Miss Braddon, is now  
running in THE DAILY and WEEKLY GLOBE, and will be continued till completed. It will be  
succeeded by a story from the powerful pen of JUSTIN MCCARTHY, and after the last named  
story is completed there will follow one from E. L. FARJEON, the famous novelist.

In addition to the regular continued story, there are always running in the 12 and 3 o'clock  
editions of DAILY and in THE WEEKLY GLOBE one or more additional novels by authors of  
world-wide repute. In this manner readers get five or six complete novels each year.

AS AN AGRICULTURAL NEWSPAPER THE WEEKLY GLOBE IS UNRIVALLED.

## SPURGEON'S SERMON

(Revised by Spurgeon's own hand, given every week in Saturday's DAILY GLOBE and in THE  
WEEKLY GLOBE, under special and exclusive arrangement for the Dominion of Canada.  
The Rev. C. H. Spurgeon is, beyond question, the most widely-read preacher in the world,  
and is always racy, practical and instructive.

Address, THE GLOBE PRINTING CO.

TORONTO

## PRINCIPLES OF BUTTER-MAKING.

Butter-making, so far as a knowledge of its principles is concerned, is still in its infancy; and there is no field of agricultural investigation which offers a wider scope for the ambitious experimenter. However, many important questions have recently been settled, a knowledge of which is required before you can intelligibly comprehend the answers to the numerous questions which we are almost daily receiving. By an understanding of the right basis or starting point, our interrogators can easily reason out for themselves many problems which are constantly perplexing them.

Until recently many theories were indulged in concerning the fat globule, and each butter expert followed the system which most harmonized with his theories. Late microscopic investigations have settled many disputed points, and are destined to revolutionize the existing methods of manufacture. These discoveries are more or less in harmony with the numerous experiments which have been conducted in different countries.

It has long been known that the fat globule is enclosed in an albuminous envelope, and the theory was that this envelope should be ruptured by violent churning and working, the broken membrane being severed from the globule and removed from the butter by washing. The apparatuses and temperatures employed were such as would best effect this result. It is now known that the membranous sac which encloses the fat-layers of the globule can and should be preserved intact, and if broken the flavor and the keeping qualities of the butter are impaired. In fact a majority of the globules are not broken by working. This rupture may also cause the butter to turn white by exposing the innermost layer of the globule, which being composed of stearine, the same composition as beef tallow, is nutritious and white; but white color may also be caused by churning at too high a temperature, whereby the white caseinous substance in the cream adheres to the globules. The outer layers are composed of oils which give the butter its delicious flavor; but when the membrane is broken, and these oils become mixed with the hard, tallowy substance, the butter is then rancid. This condition is being caused by violent churning and working, the latest practice is to churn a gentle, using a churn which will do the least violence to the globules, and to avoid working as much as possible.

## EFFECTS OF TEMPERATURE.

It is also a pretty generally recognized fact amongst some of the best dairy authorities that sudden and extreme changes of temperature injuriously affect the milk, cream and butter, as they favor the development of organic germs from contact with the atmosphere; so that ice in the dairy, must go if the flavor and keeping qualities of the butter are to be retained. There is, however, still a good deal of dispute about the keeping qualities of the butter made by the different systems.

## SEPARATING THE CREAM.

The understanding of this question also depends upon a knowledge of the fat globule. Of course the globules must be lighter or than the milk, else they cannot rise. All other conditions being equal, the largest globules rise first, and some do not rise at all. Hence the larger the globules the better the cow as a butter producer. The Short-horn and the Jersey give the largest globules; the Hereford and the Ayrshire the smallest; the other breeds being intermediate. The globules that rise last make the worst butter. The principal of separation by centrifugal force will now be readily understood. When milk is made to revolve rapidly in a cylindrical vessel, the globules, being specifically lighter than the milk, must move towards the centre; and the percentage of cream removed from the milk depends upon the speed of the separator. It has not been found profitable to make the velocity so great as to separate mostly all the globules from the milk; but considerably more can be profitably separated than by the settling systems.

The questions of deep vs. shallow setting being dependent upon temperature being more complicated. If two vessels, a deep and a shallow, are filled with milk, the temperature of both being the same, the globules will reach their journey's end sooner in the shallow vessel. But now let us consider the effects of temperature. When heat is applied to milk, the fats of the globules expand and become lighter more rapidly than the water and the other constituents of the milk, and the cream rises more slowly, the specific gravities being nearer alike, when the temperature is not changing. Water being a better conductor of heat than fats, the cream is somewhat behind the water of the milk in expanding or contracting, so that the specific gravity is less under a rising temperature, there being a little difference in the gravities of the milk and cream under the same temperature, and the rising of the cream then becomes very sluggish. From these facts it appears that the lighter the temperature at which the milk is set, the less should be the depth, and the lower the temperature the greater should be the depth.

Many facts have been ascertained by analysis and microscopic observations, but investigators, as a rule, are not satisfied with such tests—their minds being the value and weight of the evidence by practical tests. When the practice corroborates the other evidences, the knowledge thus acquired is termed science; otherwise, the term theory is used. The first experiments or observations may decide that a certain thing is so; but it usually requires the testimony of practice to obtain accurate figures with regard to it by a proper understanding of the foregoing principles you will readily be able to give a reason for most of the following:

## RULES FOR MAKING BUTTER.

1. The best churn is the one that will agitate most without pounding, at the same time creating a free current of air in the churn.
2. The cream should be churned into a mass of butter, but the churning should cease when the butter gathers into small particles, to the size of apple seed, so that the butter milk can easily be separated from the fats by washing.
3. The butter should be thoroughly

washed, and pure water or brine should be used. Working lowers the flavor and injures the keeping qualities.

4. Where cream is setting, the surface should not be exposed to an atmosphere much warmer than the cream.

5. The greatest percentage of cream can be got from the milk that undergoes the greatest variation of temperature. Milk set at 90 and lowered to 60 will produce about the same quantity of cream as milk set at 70 and lowered to 40, the variation in both cases being the same; but the former will produce better flavored butter. Farmers should therefore set their milk as warm as possible and let it cool to 50° or 55°, afterwards not allowing the cream or butter to vary much from these figures.

6. When farmers use the skim-milk for feeding stock, the advantage of the system separating the highest possible percentage of cream from the milk is greatly over-estimated.

7. More butter can be made from churning the milk than from any other system except the centrifugal.

8. A much larger percentage of cream can be obtained from newly calved than from old cowed cows.

9. The number of pounds of milk required for a pound of butter varies from 20 to 25 according to the richness of the milk and the system of the separation of the cream.

10. "Heavy milk" is a term applied to milk the cream of which rises slowly, leaving no distinct line of demarcation between the milk and the cream. Such cream is very thin. Heavy cream is produced by one or more of the following three causes: (1) In some breeds such as the Ayrshire the fat globules are small and specifically heavy, so that they either rise slowly, not at all, and many rise only partially. (2) In all breeds the milk becomes heavier as the milking period is prolonged, especially when the cow is in milk. (3) All milks tend to become heavy when allowed to stand before setting.

11. If set at the same temperature, say 50° to 55° milk set in ice will produce 10 to 15 per cent. more butter than when cooled with water to 50° Fahrenheit.

12. By centrifugal separation about 12 per cent. more butter can be produced than by cooling to near freezing point by ice, and about 20 per cent. more than by cooling to 50° with water.

13. Butter, if removed from the churn without working while in small granules, can be preserved fresh and sweet in brine almost indefinitely.—Farmer's Advocate.

## BAILY.

The Court of Revision met at the residence of Wm. Crofton on the 1st of June. Reeve Pettit moved that W. J. Sargent be Chairman of the court.

C.P.R. Co. appealed against their assessment on the grounds of both the assessment is illegal, and that said lands are exempt, and that said lands are vested in the Crown.

After a lengthy harangue of the representative of the C.P.R. Co. was examined the advice of our solicitor, Mr. Henderson, who was present, was acted upon, it was moved by the Reeve, seconded by Bailey.—That the assessment roll be amended striking out the name of the C.P.R. Co. wherever it appears and enter them on the non-resident roll as taxable.

Mr. D. Ayer appealed being over charged with statute labor for the current year; appeal was granted, reducing said labor to 13 days, being assessed 14 twenty-three days.

Alex. Nichol appealed, assessment being two high on north half of sec 2-11-21. The land is to a great extent under water—appeal granted and reduced to 22 per acre. A communication from J. Sharran, of Stratford, was received. He complains of being over charged with statute labor in the season of 1884. The clerk was instructed to write Mr. Sharran of his mistake. The roll was accepted from assessor and Court of Revision closed.

A meeting of the council took place at the same time—Reeve in the chair—councillors all present.

The following communications were read: From Acton Burrows, re resolution of council appointing pathmasters to carry out the provisions of Sec. 95, and that the clerk be instructed to notify all pathmasters to see that all noxious weeds on the highways and other places are destroyed. From C. J. Haycock, asking statement of number of days statute labor against all lands owned by the Hudson Bay Co. in this municipality.

Mr. Hall, Reeve of Whitehead, was present as a delegate, pressing settlement with the council of Daly for cost or part of the cost of building bridges across the Little Saskatchewan, making use of the argument that they derive no benefit from it, and claiming it is within their power to have it removed.

On receiving the advice of our solicitor, who claims we have paid our proportion of the expense, no action was taken.

Treman and Campbell—That Reeves Hall and Pettit, and Mr. Henderson meet in Brandon and call at the office of the Sec. Treas. and ascertain the cost of building and bridges, and by whom paid, and that Reeve Pettit make a report of same at next meeting.

Petition from ratepayers in Oak River asking for a bridge over the river, between sec 18 and 19.

Section 95, Sec. 95.—That said petition be laid over for the present, as the council do not feel able to expend money, owing to their depressed financial condition.

Petition from the ratepayers of the west road bound by 14, 15, 16, 17, 18, 19, asking that notices be returned to them when they collected on statute labor account for 1882, as no statute labor was performed, and to cancel the statute labor on the roll against them for 1883.

A motion was carried requesting the clerk to notify the Sec. Treas. to refund or credit said parties the amounts charged on the roll against them for the seasons of 1882 and 1883.

A motion was passed appointing Reeve Pettit, John Bradley and J. Campbell as delegates to interview the parties owning land on the trails to Brandon over the Little Saskatchewan bridges: and if possible to arrange with them for a permanent roadway

and to report the result at the next meeting of council.

The following accounts were presented:  
F. C. Thorn, assessor, ..... \$13.00  
Z. Baily, services rendered, ..... 18.40  
J. Sibbold, do ..... 3.60  
J. Harper, timber furnished, ..... 13.00  
M. Kerner, use of school room ..... 4.00  
Freeland & Christie ..... 8.50  
Mail Printing Co. .... 5.00  
Sun office, ..... 4.00

The above accounts were referred to the Finance Committee, and ordered paid as soon as funds can be procured.  
Council adjourned to meet again at the call of the Reeve.

## TOWN TOPICS

Mr. J. M. Egan, of the C.P.R. went west Monday.

Reeve Helliwell and Treasurer Pair, of Woodworth, were in the city Monday.

Jerry Mosgrove was fined \$8.50 for the rumpus referred to in our last issue.

The police are now collecting city licenses, all of which are due before the 15th inst.

Mrs. F. C. Patterson, who has been ill for some time, is, we are happy to say, rapidly recovering.

Poles for the construction of the government telegraph from Moose Jaw northward, went west by C.P.R. during the week.

The Carberry "Mill and Elevator" Co. are advertising incorporation in the Gazette. The capital stock is to be \$50,000.

The gale on Saturday night blew the gable end out of John McVeigh's livery stable, which affords another job for the carpenters.

W. H. Hall, H. H. McCulloch and wife, A. E. Hitchcock and C. M. Bryans, of the Souris, and Dr. Gilbert and wife, of Carberry, were in the city Tuesday.

Winnipeg has made war on all its disreputable houses, and the result is the women are taking up their quarters in the very heart of the city.

Since the 1st of April, Major McKeand has been acting Colonel of the 90th battalion. Thos. Wastie, Captain, and E. Clement-Smith, Lieutenant.

The people of Minnedosa must be a barefaced community. They had but one barbar, and he has been forced to leave the place for want of patronage.

The friends of Mr. Arthur Johnston, of the C.P.R. workshops, are congratulating him this week on his marriage with Miss Cooper, a very estimable lady of this city.

Mr. Howey makes a better hand of the cleaver than he does of the bicycle, as an animal of the latter species threw him the other day giving him the limps ever since.

On Saturday night last the wind almost completely stripped Messrs. Coombs & Stewart's fine block of its tin roof. The result is a job for the tin smith that will cost upwards of \$200.

Mr. F. C. Patterson is pushing the sale of his cyclostyle, a contrivance for securing many copies of manuscript, at a very low price. He will advertise it next issue.

Wm. Boyd and El. Powell had an altercation near the Royal the other night, and the result was Boyd was fined \$1 and Powell a V on pleading guilty. He refused to pay up and was consequently sent down for 15 days.

Mr. A. C. Fraser, of Fraser Bros., had the misfortune to lose a gold chain he was wearing the other day, on some of the streets of the city, and no doubt he will give an oyster supper or something better to any one returning it to him.

At the pony race, Friday last, which attracted more than a little attention for some days, Paddy carried off the laurels with considerable ease. Little Joe is, however, still as game as ever—beaten but not vanquished.

The Winnipeg Sun says that for all practical purposes Manitoba might as well be without its representatives except Mr. Watson; and many will be much pleased if the Sun will show what Mr. Watson has done save exhibiting his ignorance, on every occasion that presented itself.

Mr. Jas. H. Hartney, the great wheat grower of the Souris, is in the city on his return from a month's visit to eastern Ontario. While in the eastern province he never failed to say a good word for Manitoba, though he met considerable prejudice against it, simply, as he thinks, because the country is yet too young to have an established history of its own.

"Our guests," the great army of the "nomads of the plain," who have been camped at the west end for some days, had an original sun dance on Sunday last. They are said to be a

Christianized band, but still they selected Sunday as a day of festivities. They all went through the manoeuvres within a ring, outside of which the squaws were compelled to stand in silent admiration. A couple of the hardest looking specimens exhibited scalps of braves they had slain in battle, and the rest recounted their deeds of heroism and valor, the whole concluding with a feast of dog soup "the ladies" had in picnic parlance so bountifully provided for the occasion.

There has been literally no news from the front for some days. The Midland Battalion, Gen. Strange, C.O. Otter and Col. Irvine are to pursue the hunt for Big Bear until he is either captured or driven up the north pole, and this is all there is to report. About 500 men will continue the chase, and the probabilities are the war will return home.

There are some young Arabs in the city who take a delight in destroying anything valuable; and, as a consequence, shade trees come in for a share of their attention. We warn the boys in time there is a heavy penalty for this, and as Mayor Smart offers \$25 reward for information leading to the identification of offenders, an example will be made of the first found out.

The assessor finds the actual population of Brandon to be 2,187, an increase of 145 since last year. To this number ought to be added about 400 more to cover the floating population. There is scarcely an empty residence in the city. The total assessment of the place is \$1,088,276, \$371,309 is for buildings and \$276,505 for personal property, the rest is for land alone.

They have a full blossomed rumpus up at the Court House. It appears complaints of carelessness have been made against Mr. Han-nam, gaoler, and the escapes of Mrs. Taylor and Long Claws, the Indian, and for shooting at "birds on the fly." These have culminated in a visit Tuesday from the Deputy Attorney-General, who has taken down all the evidence he could get for submission to the Government. It is, under the circumstances, premature to express any opinion on the matter.

And at length Gladstone has been defeated by a vote of 265 to 252, on his budget. His weak foreign policy has incurred many expenditures the country was not prepared for and his policy was to make up the amount by additional duties on tea, wines &c. This led to his defeat on Tuesday night by the vote mentioned above. The probabilities are he will resign and that the Marquis of Salisbury will be called on to form a new ministry. If this turns out to be the case Sir Michael Hicks Beech, Sir Stafford Northcote, Randolph Churchill, and T. A. Stanley will probably enter the new ministry and appeal to the country.

Bicycling is becoming quite a favorite pastime in Manitoba. Over 50 bicycles having been imported this spring. Messrs. C. B. Keenleyside & Co., Winnipeg, have imported 40 wheels from the largest bicycle makers in the world, Messrs. Singer & Co., Coventry, Eng. They are nearly all the famous "British Challenge" which holds the proud position of the "king of the wheel" and are the finest and largest stock ever imported west of Chicago. The Winnipeg bicycle club will, if it grows as rapidly in the future as in the past, soon be the banner club of Canada.

Nearly all of the Ontario agricultural implement manufacturers are petitioning the Dominion Government for the disallowance of the Manitoba Exemption Act, principally because of its retroactive force. They say that farmers of the Northwest owe them \$1,000,000 secured by nothing other than promissory notes, which are now valueless, if the makers refuse to pay. They say further that as they owe the banks heavily, the latter holding these as collateral security, the banks will now insist on payment or additional security which will effectually ruin many of their number. Their case is a hard one, to say the least of it, and calls for prompt correction.

Mr. Wilkes, formerly from near Emerson, who has recently commenced store keeping at Souris City had quite an adventure with a party named Chequar recently. It appears the offender had been entrusted with the sale of a large quantity of potatoes at Winnipeg, and on realising he skipped with \$300 in his pocket. As soon as Wilkes became aware of the state of affairs, he put the wires in operation and found his

man basking in the pleasures of the summer resort at Rat Portage. When arrested the offender offered to compromise and Wilkes thinking a "half loaf was better than no bread" accepted what he could get, and set the Frenchman at liberty.

The Editor of the "Church Times" says "We are great advocates of cycling for many reasons, not the least of which is that one who takes up the amusement as a rule, steady and companionable fellow. A drinking cyclist is a rare thing to meet with, parry, no doubt, from the fact that every rider finds that the less he drinks the more easily he can travel, and that a flask of cold tea without milk, and with a squeeze of lemon-juice and a lump of sugar in it beats, for thirst-quenching purposes, all the sprays in the world, and is, indeed, better even than beer. To, everybody knows is presumably the whee man's beverage, and much to the whee man's meat—a very expensive luxury, especially at the reduced tariff allowed now at so many clubs to members of the Cyclists' Touring Club. The expenses at first are certainly rather heavy, because a good machine—and nobody but a rich man can afford to buy a bad one—involve a considerable outlay, but when this is once overcome they can hardly be a less costly amusement than wheeling, or one by which the expenditure of a few shillings will afford more personal gratification or conduce more to maintain a healthy mind in a healthy body."—Cyclist, May 59.

## THE REBELLION.

## FROM CLARKE'S CROSSING

The Wounded Doing Well—Supplies For Gen. Middleton—Skeff Elliott's Boy.

Clarke's Crossing, June 4th.—Capt. Mason, Tenth Royal Grenadiers, and Private Canfield, Ninetieth, left the hospital at Saskatoon yesterday for home via Moose Jaw. Dr. Canfield, of Toronto, father of the latter accompanied them. The other wounded are doing well, including Corp. Lethbridge, who has taken another turn for the better, and is said by his medical attendant to be out of danger.

Eighty teams arrived last night from Battleford, and leave to-morrow morning with supplies for the front. Col. Deacon, with two companies of the Midland Battalion, who have been here for some weeks, and 25 of Boulton's scouts leave with them. They will follow the trail to the Elbow and then to the steamer for Battleford. "E" company of the 7th Fusiliers, under Capt. Peters, has gone to the west side of the river to guard the supplies yet awaiting transport to the front.

Dr. Fraser, surgeon of the 7th Fusiliers, arrived to-day from Prince Albert, where he had gone to assist in getting the body of Skeff Elliott, of London, killed in the Duck Lake fight. The doctor, with Hume Elliott, brother of the unfortunate young man, succeeded in getting the remains, which are now on the way east via Humboldt, in charge of Hume Elliott and an escort of Mounted Police. The doctor stopped at Batouche on his way down. He reports everything quiet. In conversation with Father Vegeville the latter declared that only 11 bullets and two Indians were killed at Batouche, and that including Duck Lake and Fish Creek, the total number of bullets killed was not more than 24 at the very outmost.

MIDDLETON'S CAMP, 5 Miles Below Fort Pitt, June 2; via Battleford, N. W. T. June 6.—General Middleton and staff rode to Gen. Strange's position, nine miles northeast of the river over the scene of the late engagement, and found that the Indians' position had been strongly entrenched. Major Steele, with 80 mounted men, started on Big Bear's trail this morning. The Indians appear to have broken up considerably. The trails seem to be going in different directions, but the one in body is still with the chief. Major Steele's object is to head them off and force a stand. Gen. Middleton's mounted men, about 200 will follow up to-morrow. Fort Pitt will be made the base of supplies.

THE ESCAPED PRISONERS.  
The correct list of prisoners is Mr. and Mrs. Edward Dufresne, Francis Dufresne and wife, William Cameron. They say the McLeans, Mrs. Delancy, Mrs. G. W. Delancy and Mrs. Mann are with Big Bear and are being treated well. Dufresne has offered to go into the Indian camp with a message from Middleton. It is likely the offer will be taken advantage of. Cameron has proposed as to the names of the Indians who committed the atrocities at Frog Lake. He also corroborates the statement that the prisoners now with Big Bear have not been treated. Those taken at Frog Lake were saved by the efforts of the local Indians, some of Big Bear's followers being determined to kill them.

PUSHING BIG BEAR.  
If the Indians escape from Steele's men up North, the proposition is to send the whole mounted force after them. The men horses will be fitted with pack saddles to facilitate progress through the difficult northern country. The foot soldiers will probably be here in camp several days.

Big Bear Found Again.  
Fort Pitt, June 4, via Battleford, June 6 Major Steele and his 80 mounted men followed the trail of Big Bear's party, and came up with them yesterday morning as they were preparing to move out the camp. They were camped in the vicinity of Frog Lake, about fifty miles to the northwest of Steele's force was too small to make an attack in front and he resorted to strategy. He first sent interpreter McKay to have a parley, but the Indians flew upon him probably in retaliation for the killing of their messenger by a shell in a previous engagement. McKay was able to shoot a message to the chief, offering to stop off at a station if the prisoners were liberated but the answer said not to do that. He heard the firing went on. Big Bear's movement the Indians were driven across a coulee, where they obtained so strong a

position that Steele did not venture to follow. Three men of Steele's force were wounded, namely Sgt. Furry, of the police, in the breast, William West, a scout in the knee, and J. Fiske, of the mounted rifles, in the arm. Steele will shortly be reinforced, when the attack will be renewed.

Saved at Last.  
Fort Pitt, June 5th, via Straubenzie, June 7.—Mrs. Delancy and G. W. Delancy were brought in to-day by a party of scouts from Big Bear last Monday. They escaped from Big Bear last Monday. If they had been taken, they would have been killed. They were travelling rapidly, and left these people some distance behind. They turned their horses into another trail and escaped. They travelled towards Frog Lake, and were surrounded by a party of our men, who followed and came up with them, thinking they were Indians. Both ladies show the effects of the hardships endured. They say that a half-breed named Prichard has been the means of saving them from any cruelties by the Indians, and they have been well treated.

## FOUND.

ON the 15th of April, a pony mare, branded on the right hip. Owner can recover the same on giving a correct description and paying expenses. Apply by letter in the first instance to

REV. W. A. BURNHAM, Griswold.
